

IRRIGATION SYSTEM	FEATURES AND BENEFITS	CONSIDERATIONS WHEN DESIGNING AND SPECIFYING A SYSTEM
<p>Pop-up sprinkler irrigation</p> 	<ul style="list-style-type: none"> • Below ground situation means grass maintenance can be carried out without removing or shifting irrigation equipment, also great for playing surfaces like sports fields, minimising risk of injury to players • Reduces potential vandalism hence suitable for public areas • Great aesthetics in that equipment is not seen, hence adding value to landscape • High uniformity potential – saving water • Systems can be easily automated so irrigation can take place at night, great for golf clubs, sports fields, school grounds etc • Low maintenance, with simple maintenance, systems have a long life 	<ul style="list-style-type: none"> • Can be high cost compared to a basic hand shift garden sprinkler, but the other benefits are huge • Important to be designed by specialist companies like WaterForce, as modifications can be expensive
