

Start your career

with one of New Zealand's leading companies working in the
agriculture, viticulture and horticultural markets

WaterForce

→ What we do

WaterForce is a leading irrigation company with branches throughout New Zealand servicing the agriculture, viticulture and horticultural sectors as well as residential and commercial properties.

WaterForce specialises in:

- pumping
- irrigation
- frost protection
- water purification and treatment
- effluent disposal
- pipe systems
- and more...

At **WaterForce** we have years of knowledge and technical expertise in the industry. We have developed key partnerships; from local subcontractors to national and international manufacturers. We are always looking for innovation and ways to improve our performance.

Our company mission statement –

To contribute to our customers' success by providing solutions of excellence and value.

WaterForce

→ What we can do for you

WaterForce is committed to offering career opportunities for graduates.

Working for **WaterForce** will provide you with:

- variety
- nationwide opportunities
- both indoor and outdoor work
- a supportive and enjoyable work environment
- a competitive compensation package
- comprehensive training and development.

Learn about:

- **Water Hydraulics** – dealing with hydraulic gradients, the movement of water through pipe, water hammer, water velocities, friction loss, mainline, submains, laterals, and the relationship between air, water, and pipelines
- **Pump Selection** – working with electric, diesel, submersible, and surface pumps. Suction, NPSHa & NPSHr, pump selection, cavitation, variable speed drives. We will teach you the correct way to design a pumping system
- **Water Treatment** – filtration, water softeners, iron removal, coliform and bacteria removal, domestic and commercial applications
- **Filtration** – manual, semi automatic, and automatic filtration to suit industrial, and agricultural/horticultural applications
- **System Design** – associating your ideas with our team, many of the most experienced and superior designers in the country.
System layout, brainstorming, a practical approach, understanding client's needs, providing a solution which is technically sound and appropriate for the application
- **Sales** – the sales process and the importance of professionalism, presentation, and communication skills
- **Project Management** – bringing together product, plans, and people to provide the desired outcome for **WaterForce** and the client
- **General Business Management** – debtors, creditors, stock control, job cost, and other related systems.

How to apply ←

You don't need to have previous experience to join our team. All we ask is that you have a desire to learn and a genuine passion for our industry. Even if you are unsure of what area you might like to eventually specialise in, talk to us about the potential to build your career with **WaterForce**.

Suitable graduates will have an interest, background, or related degree in agriculture, horticulture or viticulture.

Candidates should enjoy or have a desire to learn and develop their knowledge in the following areas:

- water hydraulics
- pump selection
- water treatment
- filtration
- system design
- sales
- project management
- general business management.

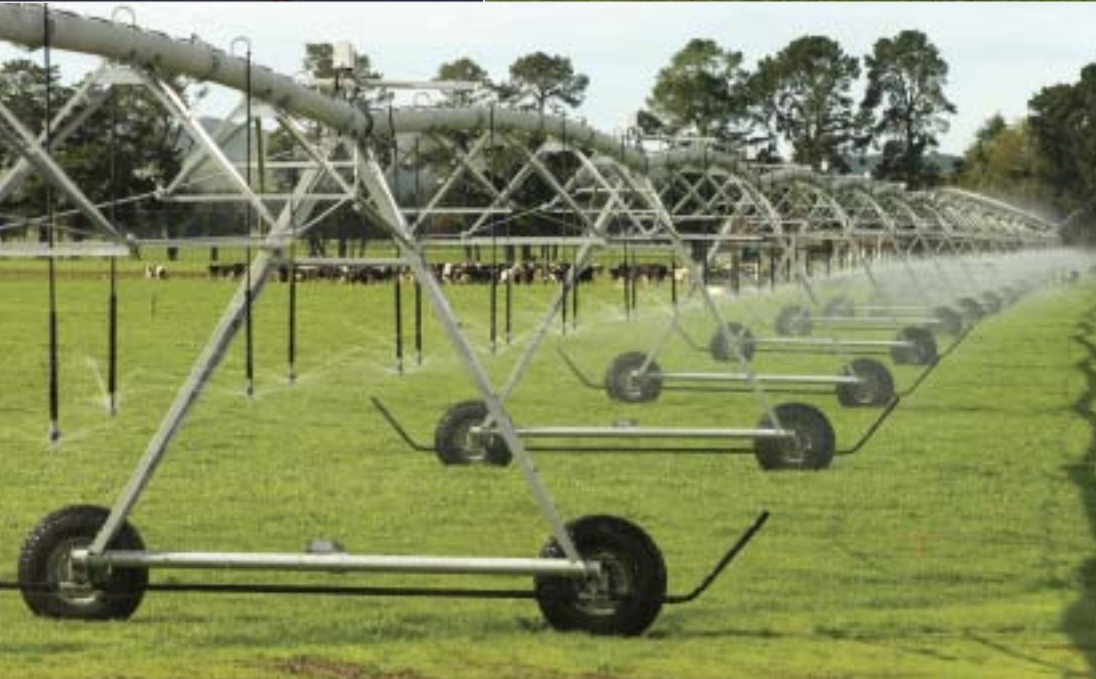

Positions available nationwide.
