

WATER IS A PRECIOUS RESOURCE

SCADAfarm is here to help you manage it wisely

Having accurate soil moisture and temperature data at your fingertips can help you optimise your irrigation plan, save water and find the right balance to maximise crop growth and quality.

Deciding when to irrigate, how much water to put on and in what precise spot, are complex decisions that can affect the success of your operation.

SCADAfarm Soil Moisture can help you:

- Avoid over-watering.
- Optimise plant growth.
- Support environmental responsibilities.
- Make important irrigation management decisions.

Find out how SCADAfarm can meet your needs.

Call (06) 876 8178, visit scadafarm.com or contact your local WaterForce reseller and installer on 0800 4 36723.
